Conclusion – Power Query Lists

- ✓ Power Query lists are an excellent **weapon** to clear & prepare your Data.
- ✓ We covered: Parameters, List.Contains, Text.Split, Lines.FromText, Table.ToRows, List.Difference, Table.FromColumns, List.Dates, List.Select, Table.TransformColumnNames
- ✓ Most of Power Query Lists **Operations** can **fold back** to the **source** (when possible).
- ✓ You can also use Power Query lists in **Excel, Dataflows Gen1, Dataflows Gen2 (Fabric), Power Platform Dataflows...**
